SKILLS

- **Languages**: C++, JavaScript, C, HTML5, CSS
- **Frameworks**: NodeJS
- **Tools/Platforms**: AWS cloud, Git & GitHub
- **Soft Skills**: Problem-Solving, Time-Management, Team Player, Adaptability

PROJECTS

Shoe Kart - E- Commerce Web Application: link — January 2026 – February 2026

- Developed a fully functional multi-category e-commerce shoe store with dynamic product filtering, real-time search, and cart management using JavaScript.
- Implemented a persistent shopping cart with local Storage integration, supporting add/remove functionality and live item count updates.
- Built a responsive UI using CSS Grid and Flexbox, optimized for desktop, tablet, and mobile viewports.
- **Technologies:** HTML5, CSS3, JavaScript, Responsive Web Design

Pathfinding Visualizer – Interactive Algorithm Simulation Tool: git — August 2024 – September 2024

- Implemented and visualized 4 classic pathfinding algorithms — Dijkstra's, A*, BFS, and DFS — on an interactive 20×40 grid with real-time step-by-step animation.
- Built interactive grid controls enabling users to draw/erase walls, drag start/end nodes, and observe algorithm traversal behavior dynamically.
- Engineered asynchronous animation engine using JavaScript Promises and async /Await to visualize node exploration and shortest path reconstruction in real time
- Displayed live performance metrics including nodes visited, path length, and execution time to compare algorithm efficiency.
- **Technologies:** HTML5, CSS3, JavaScript, Algorithm Design, Data Structures

TRAINING

Basics of Data Structures and Algorithms – Lovely Professional University: git — June 2025 – July 2025

- Learned core DSA concepts including arrays, stacks, queues, trees, and sorting/searching.
- Gained hands-on practice in solving algorithmic problems. Covered arrays, linked lists, stacks, queues, trees, graphs, sorting, and searching techniques.
- Built a student performance predictor project application that helps students predict their future CGPA based on their current academic data such as CGPA, attendance, and study hours using optimized data-structure techniques.

CERTIFICATES

- ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM | Infosys link — August 2025
- Build Generative AI Apps and Solutions with No-Code Tools | Infosys link — August 2025
- Basics of Data Structures and Algorithms | Lovely Professional University link — July 2025
- AWS Academy Graduate - AWS Academy Cloud Foundations | AWS link — April 2025
- Deep learning | NPTEL link — April 2025
- The Bits and Bytes of Computer Networking | Coursera link — September 2024
- Introduction to Hardware and Operating Systems | Coursera link — September 2024

EXTRACURRICULAR-ACTIVITIES

Participated in Hackathon: Webका Hackathon link — March 2024

Worked with a cross-functional team to build a working prototype and present the final solution to judges.

EDUCATION

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.18*** — *Since August 2023*
- **B.B.M.B D A V School** — Hoshiarpur, Punjab
  Intermediate; ***Percentage: 84.8%*** — *April 2020 – March 2021*
- **S.D SENIOR SECONADARY SCHOOL** — Hoshiarpur, Punjab
  Matriculation; ***Percentage: 83%*** — April 2018 - March 2019
